“To every man there comes that special moment when he is figuratively tapped on the shoulder and offered the chance to do a special thing unique to him and fitted to his talent. What a tragedy, if that moment finds him unprepared or unqualified for the work which would be his finest hour.”
Make No Little Plans
Make No Little Plans

Make no little plans. They have no magic to stir men's blood and probably themselves will not be realized.

Make big plans; aim high in hope and work, remembering that a noble, logical diagram once recorded will never die, but long after we are gone will be a living thing, asserting itself with ever-growing insistency.

Remember that our sons and grandsons are going to do things that would stagger us. Let your watchword be order and your beacon beauty.

Think big.
